### **M2G Energy Conservation**

To whom it may concern,

The Royal College of Surgeons in Ireland has installed the M2G software units from GEM at 3 of our sites. These are operational since March 2004. We review our energy usage and cost on a monthly basis and can safely say that the installation of these units has reduced our energy consumption by 15% in the smaller sites and nearly 20% in the larger site.

This is making a large impact on the Colleges utilities bill with no apparent reports of under cooling or discomfort from staff or students.
